

NOTICE FOR LANDS OF THE NATIONAL FOREST SYSTEM  
UNDER JURISDICTION OF  
DEPARTMENT OF AGRICULTURE

The permittee/lessee must comply with all the rules and regulations of the Secretary of Agriculture set forth at Title 36, Chapter II, of the Code of Federal Regulations governing the use and management of the National Forest System (NFS) when not inconsistent with the rights granted by the Secretary of Interior in the permit. The Secretary of Agriculture's rules and regulations must be complied with for (1) all use and occupancy of the NFS prior to approval of a permit/operation plan by the Secretary of the Interior, (2) uses of all existing improvements, such as forest development roads, within and outside the area permitted by the Secretary of the Interior, and (3) use and occupancy of the NFS not authorized by a permit/operation plan approved by the Secretary of the Interior.

All matters related to this stipulation are to be addressed to:

**District Ranger**, Douglas Ranger District  
Thunder Basin National Grassland  
2250 East Richards Street  
Douglas, WY 82633  
(307) 358-4690

who is the authorized representative of the Secretary of Agriculture.

**NOTICE**

**CULTURAL AND PALEONTOLOGICAL RESOURCES** - The FS is responsible for assuring that the leased lands are examined to determine if cultural resources are present and to specify mitigation measures. Prior to undertaking any surface-disturbing activities on the lands covered by this lease, the lessee or operator, unless notified to the contrary by the FS, shall:

1. Contact the FS to determine if a site specific cultural resource inventory is required. If a survey is required, then:
2. Engage the services of a cultural resource specialist acceptable to the FS to conduct a cultural resource inventory of the area of proposed surface disturbance. The operator may elect to inventory an area larger than the area of proposed disturbance to cover possible site relocation which may result from environmental or other considerations. An acceptable inventory report is to be submitted to the FS for review and approval at the time a surface disturbing plan of operation is submitted.

3. Implement mitigation measures required by the FS and BLM to preserve or avoid destruction of cultural resource values. Mitigation may include relocation of proposed facilities, testing, salvage, and recordation or other protective measures. All costs of the inventory and mitigation will be borne by the lessee or operator, and all data and materials salvaged will remain under the jurisdiction of the U.S. Government as appropriate.

The lessee or operator shall immediately bring to the attention of the FS and BLM any cultural or paleontological resources or any other objects of scientific interest discovered as a result of surface operations under this lease, and shall leave such discoveries intact until directed to proceed by FS and BLM.

ENDANGERED OR THREATENED SPECIES - The FS is responsible for assuring that the leased land is examined prior to undertaking any surface-disturbing activities to determine effects upon any plant or animal species listed or proposed for listing as endangered or threatened, or their habitats. The findings of this examination may result in some restrictions to the operator's plans or even disallow use and occupancy that would be in violation of the Endangered Species Act of 1973 by detrimentally affecting endangered or threatened species or their habitats.

The lessee/operator may, unless notified by the FS that the examination is not necessary, conduct the examination on the leased lands at his discretion and cost. This examination must be done by or under the supervision of a qualified resource specialist approved by the FS. An acceptable report must be provided to the FS identifying the anticipated effects of a proposed action on endangered or threatened species or their habitats.

This Notice applies to parcels: WY-0606-001, WY-0606-003, WY-0606-008,  
WY-0606-009, WY-0606-013

**NO SURFACE OCCUPANCY STIPULATION  
SAGE GROUSE DISPLAY GROUNDS**

**No surface occupancy or use is allowed on the lands described below (legal subdivision or other description).**

No surface occupancy and use is allowed within 0.25 mile (line-of-sight) of a sage grouse display ground.

T. 44 N., R. 63 W., 6<sup>th</sup> PM

Sec. 1: Lot 4;

Sec. 1: SWNW;

On portions (or all, which ever is applicable) of the lands as shown on the attached map, Exhibit A. All lands that fall within the designated active sage grouse display grounds fall within the jurisdiction of this stipulation.

**For the purpose of:**

Preventing abandonment of display grounds, reduced reproductive success, and adverse habitat loss.

Waivers, exceptions, or modifications (WEMs) to this stipulation will be considered only at the time operations are proposed, and will be subject to the Forest Land and Resource Management Plan in effect at the time of consideration, and will be subject to applicable regulatory and environmental compliance requirements. Granting of a WEM is a discretionary action which the operator should not routinely expect. The Forest Service reserves the right to impose other stipulations in the same area of the leasehold if a WEM is granted.

**Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820).**

This Stipulation applies to parcel: WY-0606-001

**NO SURFACE OCCUPANCY STIPULATION**  
SLOPES 25 – 40%

**No surface occupancy or use is allowed on the lands described below (legal subdivision or other description).**

Surface occupancy and use is prohibited on slopes between 24 – 40 percent with either highly erodible soils or soils susceptible to mass failure.

T. 47 N., R. 66 W., 6<sup>th</sup> PM  
Sec. 24: SWSW;

On portions (or all, which ever is applicable) of the lands as shown on the attached map, Exhibit A. All lands with slopes between 25 and 40 percent fall within the jurisdiction of this stipulation.

**For the purpose of:**

Protecting soil resources from loss of productivity, prevent erosion on steep slopes, soil mass movement, and resultant sedimentation.

Waivers, exceptions, or modifications (WEMs) to this stipulation will be considered only at the time operations are proposed, and will be subject to the Forest Land and Resource Management Plan in effect at the time of consideration, and will be subject to applicable regulatory and environmental compliance requirements. Granting of a WEM is a discretionary action which the operator should not routinely expect. The Forest Service reserves the right to impose other stipulations in the same area of the leasehold if a WEM is granted.

**Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820).**

This Stipulation applies to parcel: WY-0606-003

**NO SURFACE OCCUPANCY STIPULATION**  
SLOPES 25 – 40%

**No surface occupancy or use is allowed on the lands described below (legal subdivision or other description).**

Surface occupancy and use is prohibited on slopes between 24 – 40 percent with either highly erodible soils or soils susceptible to mass failure.

T. 41 N., R. 67 W., 6<sup>th</sup> PM

Sec. 3: Lots 3, 4;

Sec. 3: SENE, S2NW, NWSW, SESW, S2SE;

On portions (or all, which ever is applicable) of the lands as shown on the attached map, Exhibit A. All lands with slopes between 25 and 40 percent fall within the jurisdiction of this stipulation.

**For the purpose of:**

Protecting soil resources from loss of productivity, prevent erosion on steep slopes, soil mass movement, and resultant sedimentation.

Waivers, exceptions, or modifications (WEMs) to this stipulation will be considered only at the time operations are proposed, and will be subject to the Forest Land and Resource Management Plan in effect at the time of consideration, and will be subject to applicable regulatory and environmental compliance requirements. Granting of a WEM is a discretionary action which the operator should not routinely expect. The Forest Service reserves the right to impose other stipulations in the same area of the leasehold if a WEM is granted.

**Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820).**

This Stipulation applies to parcel: WY-0606-008

**NO SURFACE OCCUPANCY STIPULATION**  
**SPECIAL INTEREST AREA – Historic Rangeland**

**No surface occupancy or use is allowed on the lands described below (legal subdivision or other description).**

No surface occupancy or use is allowed within the boundaries of Cow Creek Historic Rangeland Special Interest Area.

T. 38 N., R. 68 W., 6<sup>th</sup> PM  
Sec. 35: N2N2, SWNE;

On portions (or all, which ever is applicable) of the lands as shown on the attached map, Exhibit A.

**For the purpose of:**

Protecting the natural landscape, while providing a recreational opportunity to participate in a setting similar to the open range days.

Waivers, exceptions, or modifications (WEMs) to this stipulation will be considered only at the time operations are proposed, and will be subject to the Forest Land and Resource Management Plan in effect at the time of consideration, and will be subject to applicable regulatory and environmental compliance requirements. Granting of a WEM is a discretionary action which the operator should not routinely expect. The Forest Service reserves the right to impose other stipulations in the same area of the leasehold if a WEM is granted.

**Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820).**

This Stipulation applies to parcel: WY-0606-013

**TIMING LIMITATION STIPULATION  
SAGE GROUSE DISPLAY GROUNDS**

**No surface use is allowed during the following time period(s). This stipulation does not apply to operation and maintenance of production facilities.**

Surface use is prohibited from March 1 through June 15 within 2 miles (line of sight) of a sage grouse display ground, and noise from production facilities must not exceed 49 decibels (10 dBA above background noise) at the display ground.

**On the lands described below:**

ALL LANDS

On portions (or all, which ever is applicable) of the lands as shown on the attached map, Exhibit A. All lands that fall within the designated active sage grouse display grounds fall within the jurisdiction of this stipulation.

**For the purpose of (reasons):**

Preventing abandonment of display grounds and reduced reproductive success.

Waivers, exceptions, or modifications (WEM's) to this stipulation will be considered only at the time operations are proposed, and will be subject to the Forest Land and Resource Management Plan in effect at the time of consideration, and will be subject to applicable regulatory and environmental compliance requirements. Granting of a WEM is a discretionary action which the operator should not routinely expect. The Forest Service reserves the right to impose other stipulations in the same area of this leasehold if a WEM is granted.

**Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)**

This Stipulation applies to parcel: WY-0606-001, WY-0606-009

**TIMING LIMITATION STIPULATION  
SAGE GROUSE DISPLAY GROUNDS**

**No surface use is allowed during the following time period(s). This stipulation does not apply to operation and maintenance of production facilities.**

Surface use is prohibited from March 1 through June 15 within 2 miles (line of sight) of a sage grouse display ground, and noise from production facilities must not exceed 49 decibels (10 dBA above background noise) at the display ground.

**On the lands described below:**

Sec. 3: S2N2, N2S2;

On portions (or all, which ever is applicable) of the lands as shown on the attached map, Exhibit A. All lands that fall within the designated active sage grouse display grounds fall within the jurisdiction of this stipulation.

**For the purpose of (reasons):**

Preventing abandonment of display grounds and reduced reproductive success.

Waivers, exceptions, or modifications (WEM's) to this stipulation will be considered only at the time operations are proposed, and will be subject to the Forest Land and Resource Management Plan in effect at the time of consideration, and will be subject to applicable regulatory and environmental compliance requirements. Granting of a WEM is a discretionary action which the operator should not routinely expect. The Forest Service reserves the right to impose other stipulations in the same area of this leasehold if a WEM is granted.

**Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)**

This Stipulation applies to parcel: WY-0606-008

**TIMING LIMITATION STIPULATION  
GOLDEN EAGLE NESTS**

**No surface use is allowed during the following time period(s). This stipulation does not apply to operation and maintenance of production facilities.**

Surface use is prohibited from February 1 through July 31 within 0.50 miles (line of sight) of golden eagle nests.

**On the lands described below:**

T. 38 N., R. 68 W., 6<sup>th</sup> PM  
Sec. 35: N2NE, NENW;

On portions (or all, which ever is applicable) of the lands as shown on the attached map, Exhibit A. All lands that fall within 0.50 mile (line-of-sight) of golden eagle nest fall within the jurisdiction of this stipulation.

**For the purpose of (reasons):**

Preventing reduced reproductive success.

Waivers, exceptions, or modifications (WEM's) to this stipulation will be considered only at the time operations are proposed, and will be subject to the Forest Land and Resource Management Plan in effect at the time of consideration, and will be subject to applicable regulatory and environmental compliance requirements. Granting of a WEM is a discretionary action which the operator should not routinely expect. The Forest Service reserves the right to impose other stipulations in the same area of this leasehold if a WEM is granted.

**Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)**

This Stipulation applies to parcel: WY-0606-013

**CONTROLLED SURFACE USE STIPULATION  
MODERATE SCENIC INTEGRITY OBJECTIVE (SIO) AREA**

**Surface occupancy or use is subject to the following special operating constraints.**

Surface occupancy and use is subject to operational constraints to maintain a landscape character that is no more than slightly altered. Noticeable deviations must remain visually subordinate to the landscape character being viewed.

**On lands described below:**

T. 41 N., R. 67 W., 6<sup>th</sup> PM  
Sec. 3: W2SW, SWNW;

On portions (or all, which ever is applicable) of the lands as shown on the attached map, Exhibit A. All lands within the designated moderate scenic integrity objective area fall within the jurisdiction of this stipulation.

**For the purpose of:**

Maintaining the scenic integrity objective (SIO) for areas identified as moderate.

Waivers, exceptions, or modifications (WEM'S) to this stipulation will be considered only at the time operations are proposed, and will be subject to the Forest Land and Resource Management Plan in effect at the time of consideration, and will be subject to applicable regulatory and environmental compliance requirements. Granting of a WEM is a discretionary action which the operator should not routinely expect. The Forest Service reserves the right to impose other stipulations in the same area of this leasehold if a WEM is granted.

**Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1650 and 2820.)**

This Stipulation applies to parcel: WY-0606-008

## **CONTROLLED SURFACE USE STIPULATION**

### **PALEONTOLOGY - Fossils**

#### **Surface occupancy or use is subject to the following special operating constraints.**

Prior to undertaking any surface-disturbing activities on the lands covered by this lease, the lessee or operator, unless notified to the contrary by the Forest Service, shall:

- 1) Contact the Forest Service to determine if a site-specific vertebrate paleontological inventory is required. The Forest Service will conduct inventories and surveys as part of the field review for the proposed activity on the lease. The operator may voluntarily engage the services of a qualified paleontologist to conduct the inventory.
- 2) Implement mitigation measures required by the Forest Service and Bureau of Land Management to preserve or avoid destruction of vertebrate paleontologic resources. Mitigation may include relocation of proposed facilities or other protective measures.
- 3) The lessee or operator shall immediately bring to the attention of the Forest Service any vertebrate paleontologic resources discovered as a result of surface operation under this lease, and shall leave such discoveries intact until directed to proceed by the Forest Service.

#### **On lands described below:**

ALL LANDS

On portions (or all, which ever is applicable) of the lands as shown on the attached map, Exhibit A. All lands within the designated paleontology area fall within the jurisdiction of this stipulation.

#### **For the purpose of:**

Protecting fossils and immediate environment of the site, including inherent scientific, natural historic, interpretive, educational, and recreational values for the area potentially impacted.

Waivers, exceptions, or modifications (WEM'S) to this stipulation will be considered only at the time operations are proposed, and will be subject to the Forest Land and Resource Management Plan in effect at the time of consideration, and will be subject to applicable regulatory and environmental compliance requirements. Granting of a WEM is a discretionary action which the operator should not routinely expect. The Forest Service reserves the right to impose other stipulations in the same area of this leasehold if a WEM is granted.

**Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1650 and 2820.)**

This Stipulation applies to parcels: WY-0606-001, WY-0606-003, WY-0606-008,  
WY-0606-009

**CONTROLLED SURFACE USE STIPULATION**  
**PALEONTOLOGY - Fossils**

**Surface occupancy or use is subject to the following special operating constraints.**

Prior to undertaking any surface-disturbing activities on the lands covered by this lease, the lessee or operator, unless notified to the contrary by the Forest Service, shall:

NOTICE FOR LANDS OF THE NATIONAL FOREST SYSTEM  
UNDER JURISDICTION OF  
DEPARTMENT OF AGRICULTURE

The permittee/lessee must comply with all the rules and regulations of the Secretary of Agriculture set forth at Title 36, Chapter II, of the Code of Federal Regulations governing the use and management of the National Forest System (NFS) when not inconsistent with the rights granted by the Secretary of Interior in the permit. The Secretary of Agriculture's rules and regulations must be complied with for (1) all use and occupancy of the NFS prior to approval of a permit/operation plan by the Secretary of the Interior, (2) uses of all existing improvements, such as forest development roads, within and outside the area permitted by the Secretary of the Interior, and (3) use and occupancy of the NFS not authorized by a permit/operation plan approved by the Secretary of the Interior.

All matters related to this stipulation are to be addressed to:

**District Ranger**, Clarks Fork Ranger District  
Shoshone National Forest  
203A Yellowstone Avenue  
Cody, WY 82414-9313  
(307) 527-6921

who is the authorized representative of the Secretary of Agriculture.

**NOTICE**

**CULTURAL AND PALEONTOLOGICAL RESOURCES** - The FS is responsible for assuring that the leased lands are examined to determine if cultural resources are present and to specify mitigation measures. Prior to undertaking any surface-disturbing activities on the lands covered by this lease, the lessee or operator, unless notified to the contrary by the FS, shall:

1. Contact the FS to determine if a site specific cultural resource inventory is required. If a survey is required, then:
2. Engage the services of a cultural resource specialist acceptable to the FS to conduct a cultural resource inventory of the area of proposed surface disturbance. The operator may elect to inventory an area larger than the area of proposed disturbance to cover possible site relocation which may result from environmental or other considerations. An acceptable inventory report is to be submitted to the FS for review and approval at the time a surface disturbing plan of operation is submitted.

3. Implement mitigation measures required by the FS and BLM to preserve or avoid destruction of cultural resource values. Mitigation may include relocation of proposed facilities, testing, salvage, and recordation or other protective measures. All costs of the inventory and mitigation will be borne by the lessee or operator, and all data and materials salvaged will remain under the jurisdiction of the U.S. Government as appropriate.

The lessee or operator shall immediately bring to the attention of the FS and BLM any cultural or paleontological resources or any other objects of scientific interest discovered as a result of surface operations under this lease, and shall leave such discoveries intact until directed to proceed by FS and BLM.

**ENDANGERED OR THREATENED SPECIES** - The FS is responsible for assuring that the leased land is examined prior to undertaking any surface-disturbing activities to determine effects upon any plant or animal species listed or proposed for listing as endangered or threatened, or their habitats. The findings of this examination may result in some restrictions to the operator's plans or even disallow use and occupancy that would be in violation of the Endangered Species Act of 1973 by detrimentally affecting endangered or threatened species or their habitats.

The lessee/operator may, unless notified by the FS that the examination is not necessary, conduct the examination on the leased lands at his discretion and cost. This examination must be done by or under the supervision of a qualified resource specialist approved by the FS. An acceptable report must be provided to the FS identifying the anticipated effects of a proposed action on endangered or threatened species or their habitats.

**CONTROLLED SURFACE USE STIPULATION**  
**Moderate Soil and Water Hazard**

**Surface occupancy or use is subject to the following special operating constraints.** These constraints are a preliminary list of conditions which could be attached to an operating plan to meet agency objectives.

All roads will be designed according to current Forest standards.

All roads, pads, and facility sites will be engineered for adequate drainage.

All roads will be graveled when production occurs.

All drill pads will be graveled.

Special reclamation specifics such as mulches, nets, sediment traps, topsoiling, etc. will be required to reduce immediate erosion/sedimentation risks.

Oversized pits will be required.

Highest quality pipe materials and state-of-the-art placement and engineering techniques will be required to ensure a low risk of failure.

Central collection, storage and treatment facilities will be required to reduce road densities.

Road closure will be considered along with design and placement as a means for controlling recreation use that might lead to off-road vehicle damage.

Water monitoring will be required at a moderate or higher intensity.

**On lands described below:**

Protecting the soil and water resource per the Shoshone Forest Plan, as amended.

**Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)**

This Stipulation applies to parcel: WY-0606-107

**TIMING LIMITATION STIPULATION**  
**Moderate Soil and Water Hazard**

**No surface use is allowed during the following time periods (This stipulation does not apply to operation and maintenance of producing wells):**

March 1 to June 30 (unless a Forest officer determines soil moisture is low enough to allow operations and/or potential soil and water resource impacts can be mitigated.

**On the lands described below:**

ALL LANDS

On all lands as shown on the attached map, Exhibit A.

**For the purpose of (reasons):**

Protecting the soil and water resource per the Shoshone Forest Plan, as amended.

**Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)**

This Stipulation applies to parcel: WY-0606-106

**TIMING LIMITATION STIPULATION**  
**Moderate Soil and Water Hazard**

**No surface use is allowed during the following time periods (This stipulation does not apply to operation and maintenance of producing wells):**

March 1 to June 30 (unless a Forest officer determines soil moisture is low enough to allow operations and/or potential soil and water resource impacts can be mitigated.

**On the lands described below:**

T. 57 N., R. 103 W., 6<sup>TH</sup> PM

Sec. 26: SENE, W2NW, SENW, NESW, SE;

Sec. 35: Lots 1, 2, 4, NE, NWNW, S2NW, N2S2;

On all lands as shown on the attached map, Exhibit A.

**For the purpose of (reasons):**

Protecting the soil and water resource per the Shoshone Forest Plan, as amended.

**Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)**

This Stipulation applies to parcel: WY-0606-107

**CONTROLLED SURFACE USE STIPULATION**  
**Visual Quality – Partial Retention**

**Surface occupancy or use is subject to the following special operating constraints.**

Oil and gas exploration and development activities must remain “visually subordinate” to the characteristic landscape as viewed by the average public observer traveling in the adjacent travel corridor. Activities may repeat form, line, color, and texture commonly found in the characteristic landscape. Changes in their qualities of size, amount, intensity, direction, and pattern must remain visually subordinate. Activities may introduce form, line, color, and texture which are found infrequently or not at all in the characteristic landscape, but they must remain visually subordinate to the characteristic landscape.

These objectives must be met within one full growing season after completion of exploration activity. If production is proposed, development of facilities must ensure that these objectives are met within one growing season after facilities are in place. The ability of a proposed project to comply with these objectives will be subject to the interpretation and approval of the Forest Supervisor.

Before the Forest Service will authorize surface occupancy at the APD stage, an analysis of proposed activities shall indicate that the lease holder can meet these objectives.

These constraints are a preliminary list of conditions which could be attached to an operating plan to meet agency objectives.

1. Bury all pipelines
2. Use low-relief structures where possible.
3. Use camouflage shapes and colors for above-ground facilities.
4. Use submersible pumps where possible.
5. Use low standard roads.
6. Manage roads to prevent unnecessary traffic.
7. Locate sites, roads, facilities, pipelines, and other structures or impacts away from dispersed campsites, trails, travel corridors, popular lakes and streams, and other areas of concentrated public use.
8. Use common road systems for multiple operators.

**On lands described below:**

ALL LANDS

On all lands as shown on the attached map, Exhibit A.

**For the purpose of:**

Ensuring that oil and gas exploration and development activities remain “visually subordinate” to the characteristic landscape as viewed by the average public observer traveling on important travel corridors that were used in the visual management System inventory.

**Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1650 and 2820.)**

This Stipulation applies to parcel: WY-0606-106, WY-0606-107

**NO SURFACE OCCUPANCY STIPULATION**  
**Wetlands and Floodplains**

**No surface occupancy or use is allowed on the lands described below (legal subdivision or other description).**

T. 57 N., R. 103 W., 6<sup>th</sup> PM

Sec. 26: NESW, N2SE;

Sec. 35: S2NW;

On portions of the lands as shown on the attached map, Exhibit A.

**For the purpose of:**

Protecting the soil and water resource per the Shoshone Forest Plan, as amended.

**Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820).**

This Stipulation applies to parcel: WY-0606-107

**LEASE NOTICE**  
**Endangered or Threatened Species Area**

This notice is used to emphasize the requirements for protection of threatened or Endangered Species.

The lease area may contain habitat necessary for the continued existence of the threatened and endangered species listed below, which are protected by the 1973 Endangered Species Act (as amended).

The USFS is responsible for ensuring the effects of any proposed actions are not likely to jeopardize the continued existence of threatened or endangered species or adversely modify their critical habitat prior to authorizing such activities. This is accomplished by an analysis of proposed actions on leased lands through a biological evaluation prior to undertaking any surface disturbing activities. The analysis will determine the effects on any plant or animal species listed or proposed for listing as endangered or threatened. The findings of this biological evaluation and/or subsequent biological opinion from the U.S. Fish & Wildlife Service (FWS) may result in some restrictions to the operator's plans or even disallow use and occupancy that would be in violation of the 1973 Endangered Species Act (as amended), by jeopardizing the continued existence of such species or adversely modifying their critical habitat.

The lessee/operator may conduct the biological evaluation at their discretion and cost with concurrence from the USFS. This evaluation must be done by or under the supervision of a qualified resource specialist approved by the USFS. However, this does not relieve the USFS of any responsibilities under Section 7 of the Endangered Species Act (as amended) or the Interagency Cooperation Regulations (50 CFR Part 402). A report acceptable to the USFS must be provided describing the anticipated consequences of the proposed action(s) on threatened and endangered species and their habitat.

If proposed, threatened, or endangered species are discovered in the area after any required biological evaluation has concluded, an additional evaluation will be conducted to assess the effects of ongoing or proposed activities on such species. Additional restrictions or prohibitions may be imposed as necessary after consideration of the evaluation conclusions and consultation or conference with the FWS as appropriate.

The following proposed, threatened and endangered species are known or could reasonably be expected to occur within this leaseholding.

Grizzly bear (*Ursus arctos horribilis*) Threatened  
Gray wolf (*Canis lupus*) Endangered  
Canada Lynx (*Lynx Canadensis*) Threatened

The lessee/operator shall take such measures as may be required by the authorized officer, USFS, to protect such species.

This Notice applies to parcel: WY-0606-106, WY-0606-107

**LEASE NOTICE**  
**Soil and Water Hazard Area Mapping**

The Shoshone National Forest has been delineated into soil and water hazard areas based on criteria defined in the Forest Plan. There are three delineations – high, moderate, and low. Also defined in the Plan is “isolated tract”, which is an area of low or moderate hazard surrounded by an area of high hazard. High hazard areas are leased with an NSO stipulation, moderate hazard areas and isolated tracts are leased with a CSU and Timing stipulation, while low hazard areas are leased under standard form only. An important consideration is the delineations are at a scale which represents the best information at this time. The level of detail is not sufficient for project level work. It is possible the high, moderate, or low hazard delineations are incorrect.

Relative to high hazard areas, the delineation is sufficient to indicate that most of the area, pending further analysis of a project proposal, is likely to be inoperable ground. It is possible there are areas of operable ground within a high hazard delineation that are accessible using ground-based access or there is an existing road. If, at project level analysis, it is determined there are areas of operable ground or an existing road and the expected direct and indirect impacts of the project can be mitigated, then the proposed project may be permitted.

Relative to isolated tracts, the delineation is sufficient to indicate that the tract, pending further analysis of a project proposal, is likely to be inaccessible. It is possible the tract is not surrounded by high hazard areas or it has an existing road. If this case is found and the expected direct and indirect impacts of the project can be mitigated, then the proposed project may be permitted.

This Notice applies to parcel: WY-0606-106, WY-0606-107

R2-FS-2820 (92)

Serial No.: \_\_\_\_\_  
Report No.: W20030110-1

**LEASE NOTICE**  
**Water Quality Monitoring**

The lessees are hereby notified that baseline water quality data may be required prior to ground disturbing activities. An appropriate water quality monitoring plan may be necessary. Such a plan would need to be structured to adequately disclose pre-ground disturbing water quality so that potential effects can be estimated and so that mitigation effectiveness can be monitored.

This Notice applies to parcels: WY-0606-106, WY-0606-107

R2-FS-2820 (92)

Serial No.: \_\_\_\_\_  
Report No.: W20030110-1

**LEASE NOTICE**  
**Shoshone National Forest Land and Resource Management Plan**

The lessee is hereby notified that the National Forest Management Act of 1976 requires all National Forests to be managed in accordance with their respective Land and Resource Management Plans. All leases, permits and licenses for the use and occupancy of National Forest System lands are required to be consistent with completed Plans. Post-leasing surface disturbing operations will be subject to meeting management area standards prescribed in the Forest Plan, as amended by the Forest-wide leasing decision or other post-leasing NEPA decisions. The management standards and guidelines which apply to this lease area are contained within Chapter III of the Shoshone National Forest Land and Resource Plan dated January, 1986.

This Notice applies to parcels: WY-0606-106, WY-0606-107

Serial No.  
Parcel No. BT-67

**NOTICE FOR LANDS OF THE NATIONAL FOREST SYSTEM  
UNDER JURISDICTION OF  
DEPARTMENT OF AGRICULTURE**

In conducting operations associated with this lease, the lessee/operator must comply with all the rules and regulations of the Secretary of Agriculture set forth at Title 36, Chapter II, of the Code of Federal Regulations governing the use, occupancy, and management of National Forest System (NFS) lands when not inconsistent with existing lease rights granted by the Secretary of Interior.

All matters related to this *notice* are to be addressed

to: Forest Supervisor, Briger-Teton National Forest

at: P.O. Box 1888, 340 N. Cache  
Jackson, WY 83001

Telephone: 307-739-5500

who is the authorized representative of the Secretary of Agriculture.

**CULTURAL RESOURCES (36 CFR 228.108(d) & 228.12(c)(5)):** The authorized officer is responsible for ensuring that the leased lands are examined prior to undertaking any ground-disturbing activities to determine whether or not cultural resources are present, and to specify mitigation measures for effects on cultural resources. Prior to undertaking any surface-disturbing activities on the lands covered by this lease, unless notified to the contrary by the Forest Service, the lessee or operator shall:

1. Contact the Forest Service to determine if a site-specific cultural resource inventory is required.
2. If a survey is required, the lessee or operator may engage the services of a cultural resource specialist acceptable to the Forest Service to conduct a cultural resource inventory of the area of proposed surface disturbance. The operator may elect to inventory an area larger than the area of proposed disturbance to cover possible site relocation that may result from environmental considerations.
3. Implement mitigation measures required by the Forest Service to preserve or avoid destruction of cultural resource values. Mitigation may include relocation of proposed facilities, testing, salvage, and recordation or other protective measures. All costs of the inventory and mitigation will be borne by the lessee or operator, and all data and materials salvaged will remain under the jurisdiction of the U.S. Government as appropriate.

The lessee or operator shall immediately bring to the attention of the FS and BLM any cultural or paleontological resources or any other objects of scientific interest discovered as a result of surface operations under this lease, and shall leave such discoveries intact until directed to proceed by FS and BLM.

**THREATENED OR ENDANGERED SPECIES (36 CFR 228.108(f) & 228.112(c)(4)).** The Forest Service is responsible for ensuring that the leased land is examined prior to any surface-disturbing activities to determine potential effects upon any threatened, endangered, or candidate plant or animal species or their habitats. The findings of this examination may result in some restrictions to the operator's plans or even disallow use and occupancy that would be in violation of the Endangered Species Act of 1973 by detrimentally affecting endangered or threatened species or their habitats.

The lessees/operators may, unless notified by the Forest Service that the examination is not necessary, conduct the examination on the leased lands at their discretion and cost. This examination must be done by, or under the supervision of, a qualified resource specialist approved by the Forest Service.

FLOODPLAINS AND WETLANDS (36 CFR 228.108(i)): The Forest Service is responsible for ensuring compliance with Executive Order 11988, "Floodplain Management", and Executive Order 11990, "Protection of Wetlands", should any floodplain or wetland exist on the leased land.

Ground disturbing activities in the area of identified floodplain or wetland may be restricted, avoided, or precluded in order to preserve, restore, or enhance the natural and beneficial values served by these areas. Occupancy and use of lands within riparian or wetland areas, as proposed in a Surface Use Plan of Operations, will be considered in an environmental analysis, and additional mitigation measures may be required when deemed necessary to protect these areas.

This Notice applies to parcels: WY-0606-111, WY-0606-112, WY-0606-113, WY-0606-114,

WY-0606-123

## NOTICE

**Endangered or Threatened Species** – The lease area may contain habitat necessary for the continued existence of the threatened and endangered species listed below, which are protected by the 1973 Endangered Species Act (as amended).

The FS is responsible for ensuring that the leased land is examined through a biological evaluation, prior to undertaking any surface-disturbing activities, to determine effects upon any plant or animal species listed or proposed for listing as endangered or threatened, or their habitats. The finding of this biological evaluation may result in some restrictions to the operator's plans or even disallow use and occupancy that would be in violation of the 1973 Endangered Species Act (as amended), by detrimentally affecting endangered or threatened species or their habitats.

The lessee/operator may, unless notified by the FS that the biological evaluation is not necessary, conduct the evaluation on the leased lands at his discretion and cost. This biological evaluation must be done by or under the supervision of a qualified resource specialist approved by the FS. An acceptable report must be provided to the FS identifying the anticipated effects of a proposed action on endangered or threatened species or their habitats.

If proposed, threatened, or endangered species are discovered in the area after any required biological evaluation has concluded, an evaluation will be conducted to assess the effect of ongoing and proposed activities. Based on the conclusion drawn in the evaluation, additional restrictions or prohibitions may be imposed to protect the species or their habitats.

The following proposed, threatened and endangered species and their habitats are known to occur or can be expected to occur within this leaseholding, or may be affected by activities conducted within this leaseholding. The potential effects upon any other Federally classified threatened or endangered species discovered during the biological; evaluation also must be addressed.

### Whooping Crane

The lessee/operator shall take such measures as may be required by the authorized officer, Forest Service, to protect such species.

## Jackson Hole Area Oil and Gas Lease Stipulation

The lands embraced in this lease being within the area designated in the memorandum of August 15, 1947, by the Secretary of the Interior ("Oil and Gas Leases in the Jackson Hole, Wyoming Area"; Federal Register, August 30, 1947, page 5859), which specifies the general conditions under which the unitized development of the oil and gas resources is authorized, the lessee hereby agrees:

- 1) To drill only such wells on the leased land as may be authorized by the Secretary of the Interior under an approved unit plan; to drill no well within 1250 feet of any public road on or adjacent to the leased land without the consent of the Secretary of the Interior first had and obtained; to refrain from defacing, injuring, or destroying trees, shrubs, or natural features, or removing same outside of the authorized work limits or pipeline and road rights-of-way as established pursuant to, or revised in accordance with, the unit plan. After designation of the authorized work limits by the Secretary of the Interior or his representatives, lessee shall mark such limits by some acceptable visual means. The location of camps, storage, parking of equipment, and storage of materials shall be confined within the authorized work limits. Sludge or other waste by-products from drilling or operations shall be so confined or disposed of that they do not destroy scenic values or wildlife or pollute streams.
- 2) To remove at the termination of drilling operations, all camps and buildings not essential to a continuing operation of any well, and to fill all sump holes, ditches, and other excavations, remove or cover all debris, and to restore the sites to a neat and presentable condition appropriate to the surrounding landscape, and, upon any partial or total relinquishment, cancellation, or expiration of this lease as to that part of the leased land to which his rights have terminated, so far as reasonably possible, to restore the surface of the leased land to its former condition to the extent deemed necessary by the Secretary of the Interior and the Regional Forester, U.S. Forest Service, Ogden, Utah, or their authorized representatives.
- 3) To keep to an absolute minimum the number of access roads, and other travelways necessary to conduct the lessee's operations, the location of which shall be designated by the Supervisor prior to the time of their construction. Access to existing public highways shall be determined by the Supervisor at such points on the highways with due regard for sight distance restrictions, safety, or scenic considerations. The location, alignment and cross section of all roads constructed for the convenience of lessee's operations, shall be such that after discontinuance of use, they can be obliterated and the area over which they traverse can be restored to its original condition. All types of roads constructed for operational uses shall, at the termination of these uses, be obliterated where required and the area over which they traversed restored in such a manner that revegetation will be encouraged. All roads constructed for operational purposes are to be considered as private roads and the erection

of signs, locked gates, or other devices that may be required, at the discretion of the Supervisor, to discourage or prevent their use by the public shall be constructed and maintained by the lessee.

- 4) To protect the scenic and aesthetic values of roadsides, waterfronts, and recreation area zones as far as possible consistent with the authorized use in connection with construction, operation, and maintenance facilities.
- 5) To conduct operations in a manner that will offer the least possible disturbance to wildlife on or adjacent to the leased land; to exercise no methods of control or interference with such wildlife without authority first obtained from the authorized representative of the Secretary of the Interior and/or the State Game and Fish Commission; to make no claim against the Federal Government or the State on account of damage by such wildlife to improvements placed on the leased land.
- 6) To observe and comply with all State and Federal laws and regulations relating to wildlife and to take such action as is necessary to assure observation and compliance with these laws and regulations by lessee's employees and agents.

As to any land within the Cache Creek Municipal Watershed, the lease will contain the following additional stipulation:

- 7) To comply with plans heretofore made through agreement with the Forest Service and the Town Council of Jackson, Wyoming, for the protection from pollution of the municipal water during the term of this lease or any extension thereof.

\*\*\* This stipulation is applicable to entire parcel.

## NOTICE – VISUAL QUALITY OBJECTIVES

**This notice is used to emphasize the adopted visual quality objectives.**

Surface disturbing activities within this leaseholding are required to meet the visual quality objectives adopted for this Management Area. Activities which do not meet adopted visual quality objectives may be approved through an analysis which complies with the National Environmental Policy Act and includes public involvement. Management standards and guidelines contained within the Land and Resource Management Plan for the Bridger-Teton National Forest establish the framework for the visual quality objectives adopted in the Decision Notice/Finding of No Significant Impact for Oil and Gas Leasing in Management Area 24 on the Big Piney Ranger District.

The National Forest Management Act of 1976 requires that all National Forests be managed in accordance with their respective land and resource management plans. The Environmental Assessment/Decision Notice described above contains site-specific analysis and decisions which are tiered to the Record of Decision and the Final Environmental Impact Statement accompanying the Land and Resource Management Plan for the Bridger-Teton National Forest.

Address all matters related to this notice and all requests for additional information on visual quality analyses and visual quality objectives to:

Forest Supervisor  
Bridger-Teton National Forest  
340 North Cache  
P.O. Box 1888  
Jackson, WY 83001  
(307) 733-2752

who is the authorized representative of the Secretary of Agriculture.

WY-0606-116, WY-0606-117, WY-0606-118,  
WY-0606-122, WY-0606-123

## NOTICE

**Road Access Difficult or Impossible** – The construction, reconstruction, or use of roads to access this lease holding may not be permitted. Management standards contained in the Land and Resource Management Plan for the Bridger-Teton National Forest prohibit or severely limit any type of roaded access across lands in the proximity of or adjacent to this lease holding. The National Forest Management Act of 1976 requires that all National Forest be managed in accordance with their respective land and resource management plans.

Any surface-disturbing activities proposed for this lease holding, which also will require surface disturbance or occupancy of adjacent lands, will be reviewed to determine whether the proposed activities can meet the standards contained within the Land and Resource Management Plan. If existing standards cannot be met, the proposal can be denied, or standards can be revised through an amendment to the Land and Resource Management Plan.

This Notice applies to parcels: WY-0606-119, WY-0606-120, WY-0606-121

## NO SURFACE OCCUPANCY STIPULATION

No surface occupancy or use is allowed on the lands described below (legal subdivision or other description):

1. On slopes in excess of 40 percent or on technically unsuitable soils.

See Attached Map for location.

For the purpose of (reason):

1. Protecting steep slopes and unstable soils.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

## CONTROLLED SURFACE USE STIPULATION

Surface occupancy or use is subject to the following special operating constraints:

1. Off-site mitigation may be required to reduce road densities in DFC 12 areas and production facilities may be required to be moved off site and into a different DFC

On the lands described below:

See attached map

For the purpose of:

- 1 Mitigating impacts to wildlife

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)
